PROFESSIONAL EXPERIENCES

Executive Office of Technology Services and Security, Commonwealth of Massachusetts

Boston, MA | Jun 2026 – Aug 2026

Experience Research and Design Intern

- Mapped MyMassGov user journeys against telemetry logs to identify instrumentation gaps, **delivering technical recommendations** for identifier integration, event-logging configurations, and the addition of regional and accessibility data.
- **Authored comprehensive Data Quality Guidelines**, empowering cross-functional teams to **perform independent quantitative analysis** via accessible toolkits featuring examples, practical checklists, and common pitfalls for data integrity.
- Supported an **Experience Measurement** initiative by **drafting standardized evaluation templates and metrics** across multiple teams.

Samsung Electronics

Suwon, South Korea | Mar 2023 - Apr 2025

Product Manager, CX Office, Mobile eXperience Division

- **Satellite Networks**
 - Aligned hardware, software, and UX teams to **define technical requirements for satellite messaging**, ensuring feasibility for a **\$165M market opportunity**.
 - **Designed localized UX flows** by integrating requirements from global carriers (e.g., T-Mobile, Verizon), maintaining **global design consistency** alongside regional compliance.
 - Managed global QA workflows to **resolve launch-critical bugs**, and **analyzed 5K+ user feedback** entries to prioritize the roadmap.
- **Live Translate: Real-Time Call Translator**
 - Led the integration of AI-powered translation into the native Call app and third-party VoIP apps, contributing to a **3% increase in Galaxy S series adoption**.
 - **Translated user interaction data insights into technical specifications** using SQL and Python, successfully **closing a critical feature gap** against global competitors.

VoyagerX

Seoul, South Korea | Mar 2021 - Jan 2022

Product Manager Intern

- Established data-driven synopses to **break down internal silos and align cross-functional product strategy**.
- **Designed and validated a new 'Translate Captions' feature** via A/B testing and user interviews, driving **6% feature adoption** and a **3%p increase in the total user base**.
- **Executed the regional GTM strategy** in Taiwan based on 30+ iterative user tests, achieving a **5%p surge in MAU** within one month.

EDUCATION

Boston University, Faculty of Computing and Data Science

Boston, MA, United States | Sep 2025 - Dec 2026

Master of Science in Data Science

GPA: 3.86 / 4.0

- Relevant Study Areas: Human-Computer Interaction, Generative AI, Large Language Models, Computational Statistics.
- **Research Assistant**: Contributing to **LVLMM-based assistive tech** for blind and low-vision users. (Advised by Prof. Eshed Ohn-Bar)

Seoul National University

Seoul, South Korea | Mar 2018 - Feb 2023

Bachelor of Science in Computational Sciences | Bachelor of Arts in Religious Studies

GPA: 3.88 / 4.3

- Awards and Honors: Outstanding Peer Tutor - Korean Language(2020); Korea Foundation of Advanced Skills Scholarship(2020)

PROJECTS

Data Days for Good: Analysis of Youth-SRO Conflicts (Collaboration with CfJJ & MassMutual)

Mar 2026

- Analyzed regional School Resource Officer (SRO)-student disciplinary patterns by **synthesizing NLP-processed complaint narratives** with student penalty metrics, categorizing district-level risk profiles to **inform and prioritize CfJJ's legal advocacy**.
- Audited youth-involved incident records obtained via public records request and **identified critical PII redaction failures**, reporting findings directly to CfJJ to **ensure ethical data protection** and support their legal advocacy to protect youth.

TACT: Touch-Free Acoustic Control Triggers for LLMs

Jan 2026 - May 2026

- Architected a acoustic interaction model (e.g., knocks) for LLM control, validating system architecture via testing with 5 participants.
- **Prototyped a non-speech framework** to enhance **accessibility** in eyes-busy, hands-busy environments via intuitive gestures.

SKILLS

Product: A/B Testing, User Testing, User Interviews, GTM Strategy, Figma, Miro, Looker Studio, Google Analytics, Jira.

Technical: Python (Pandas, PyTorch), SQL, R, BigQuery, Google Cloud Platform, LLM APIs, NLP, Containerization (Podman/OCP), Git.
